

NEW Time & Attendance Solutions by Journeyx

Easy-to-use solutions for complex time-for-payroll needs.

With our new Acumen time and attendance product line, Journeyx helps organizations manage and increase the efficiency of their most valuable resources: their employees.

Journeyx's time and attendance systems include state-of-the-art physical time clocks and cloud-based time tracking and scheduling software that allow employees to manage time and attendance remotely, all integrated smoothly with your payroll and other business systems.

TIME CLOCK HARDWARE

Journeyx now offers advanced time clock hardware that support the use of ID badges, biometric fingerprint scanning, and facial recognition to enable the most accurate and secure employee data collection possible.

Flexible time entry methods

We provide an array of methods to track employee time and attendance with options for on-site time clock hardware, web-based time clocks, mobile time entry, biometric authentication, and much more.

Data verification and security

When it comes to employee data verification and on-site security, there is no better option than our biometric time clocks utilizing facial recognition or fingerprint scanning.

- Know with certainty who is punching in where.
- Prevent time theft and buddy punching.
- Enforce the greatest on-site security.
- Ensure perfect accuracy for time and project tracking.

TIME CLOCK SOFTWARE

Out of the box, Journyx's time clock software has more standard timekeeping features than others offer in their most advanced versions. Our software provides powerful, easy-to-use time management tools with unmatched versatility. You won't find a timekeeping system this adaptable anywhere else.

Custom rules management

Easily manage complex rules for employee work hours, overtime, variable job rates, and other pay rules.

Geofencing technology

Eliminate manual error and simplify clocking in and out with GPS-based rules enforcement, so employees can only punch in where you want them to.

Rich automation

Easily automate complex rules to track project hours, weighted overtime, variable job rates, and more.

Communicate with your employees

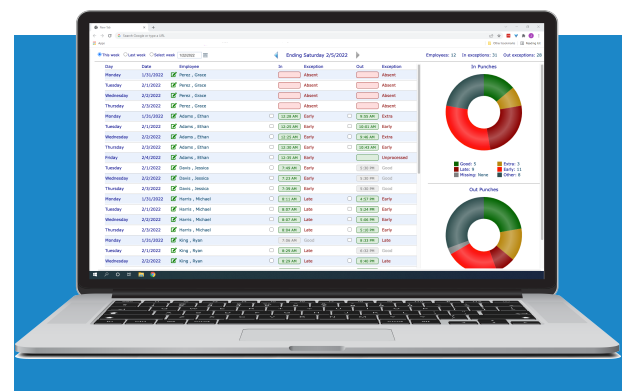

Send automated notifications via email or text for defined events, such as time off requests, late clock ins, etc.

Compliant timecard management

Ensure compliance with warnings for overtime, shift premiums, and union rules.

Robust reporting

Schedule automatic report generation for payroll with more than 60 standard reports available and endless possibilities for customized reports.

SCHEDULING SOFTWARE

With Journyx's scheduling software, managers can automate shift scheduling, account for employee availability and skillsets, and improve efficiency, all while saving your organization time and money. Empower your managers to respond quickly and strategically to the dynamics of an agile workforce.

Prevent unplanned absences and schedule conflicts

Absenteeism can cost your company thousands of dollars each year in lost productivity, wages, poor quality of goods/services, and excess management time. Not only that, but the employees who do show up to work are burdened with extra duties to fill in for absent employees, which can cause feelings of frustration and a decline in

Let your staff tell you when they are available with Journyx's employee scheduling system. You can easily factor in employee schedule requests and shift preferences to prevent call-outs and absenteeism. Plus, Journyx integrates communication tools that make creating schedules and changing shifts hassle-free.

Unlimited customization and flexibility

Every industry has its own set of scheduling challenges, which is why our robust scheduling software is designed to rise to the challenge every time. Whether you need a certain number of surgeons on staff at a hospital or want to scale your point-of-sale workforce to meet demand, our scheduling software can be configured to meet your unique business needs.

- Schedule workers by contract, department, team, or shift, factoring in the skills of each group member.
- Create certifications to identify employees with special skills and custom rules to govern their scheduling.
- Optimize processes, plan for optimal coverage, and minimize labor costs with analytics and forecasting tools.
