

Journyx & Journyx PX 11.1.0

Version 11.1.0 of Journyx and Journyx PX includes a variety of improvements and new features to make time tracking easier and smarter. With Version 11, Journyx introduced a smarter way to track time with suggested timesheet entries pulled straight from your Microsoft Exchange calendar and tasks. Version 11.1.0 includes performance and usability enhancements that improve your timesheet suggestions and make it even easier to complete. It also includes a variety of features that will make entering and managing key data in Journyx effortless.

Suggestions for Exchange Calendar and Tasks on Time Entry

Suggested entries for Exchange calendar events and tasks are for people who manage their schedules and tasks in Office 365 and want to enter time quickly. If you turn on suggestions for your timesheet, you can see all of your calendar events and tasks on your timesheet for the current period.

Suggestions for the time entry values will be included with the date, hours and details of the calendar event or task. You can edit the suggested values to accurately reflect how the time was worked, and the system will learn from your changes and make more accurate suggestions in future timesheets. As time goes by, your suggestions will become so accurate that you can simply accept them and move on with your day.

Project	Activity	Pay Type	Bill Type	Comment	Sun 03/04	Mon 03/05	Tue 03/06	Wed 03/07	Thu 03/08	Fri 03/09	Sat 03/10	Total

Other New Features & Improvements

- Crew-based entry for multiple users at once – enter work and holiday time for an entire group in a single step

The screenshot shows a software interface for time tracking. At the top, it displays the date range '02/18/2018 - 02/24/2018' and the user list 'User Z-Journyx Administrator keeping Time for 4 users: 02/18/2018-02/24/2018 - Hill, Alexandra -- McCoy, John -- Nguyen, Matthew -- Thompson, Alan'. Below this is a grid with columns for days of the week (Sun 02/18 to Sat 02/24) and a 'Total' column. The grid is divided into 'Current Entries (5)' and 'Previous Entries (10)'. A search bar is visible with the text '1-Select One'. At the bottom, there is a 'Save' button and a summary row showing total hours for each day: Sun 0:00, Mon 0:00, Tue 0:00, Wed 8:00, Thu 8:00, Fri 32:00, Sat 0:00, and a grand total of 48:00.

- Rate rule flexibility for the order of rule application and rate codes

The screenshot shows the 'Name the Rule' configuration page. It includes fields for 'Name' (Rule 1) and 'Description' (description of rule 1). Below this is the 'Select Time Parameters for Rule' section, which includes 'Timeframe' (Timesheet), 'Condition' (Hours in range), 'Trigger Hours' (0), 'Day' (*Any* Week Day, Weekend Day, Sunday), 'Date(s)' (02/20/2018), and 'Target' (Matched Hours). There are also sections for 'Define which records trigger the rule' and 'Define a subset of records for rule action (optional)'. The latter section includes 'Projects' and 'Entry Columns' tabs, with options to include all projects, only selected projects, all except selected projects, or by project custom field. It also features an 'Available Projects' list with items like '1.1 ABC Task 1-1 (2VVokm)', '1.2 ABC Task 1-2 (2VVokm)', '1.3 ABC Task 1-3 (2VVokm)', and '1 ABC Summary Task 1 (2VVokm)', along with 'Add' and 'Remove' buttons. At the bottom, there are options for 'Add Custom Field filter' and 'Match all filters (AND)' or 'Match any filters (OR)'.

- Smarter allocation of auto-assignment scheduled work when more than one person logs time (PX only)
- Journyx Projectlink 11 with new features for tying MS Project to ERP data in Journyx for easier project management and accounting
