

Customer Case Study: SemBioSys Genetics, Inc.

About SemBioSys Genetics, Inc.

With headquarters in Calgary, Alberta, SemBioSys Genetics Inc. is a biotechnology company developing protein-based pharmaceuticals for metabolic and cardiovascular diseases. The Company's lead pharmaceutical candidates are recombinant human insulin to serve the rapidly expanding global diabetes market and Apo AI, a next generation cardiovascular drug. In addition to its pharmaceutical products, SemBioSys is developing a series of non-pharmaceutical products addressing animal and aquaculture health, nutritional oils and human topical markets.

The Challenge

As SemBioSys Genetics grew larger and larger, its custom made application for tracking time was not keeping up and providing solutions for its growing needs. The custom application only tracked employee vacation time and was not scalable. The company started its search for a time tracking application on the internet and began with 12 possibilities which then narrowed to two. SemBioSys Genetics was particularly impressed with not only Timesheet, but the company behind the software – Journyx.

"[We] took comfort knowing that no matter our size, our business was important to Journyx."

– Josef Kuhn, IT Systems Manager, SemBioSys Genetics

"Journyx stood out to us by their involvement in the local community and the fact that they allow small companies to leverage Timesheet for free," says Josef Kuhn, SemBioSys Genetics IT Systems Manager. "We understood that this was both a great marketing strategy, getting the smaller market using Timesheet early, and a great way to give the little guys a leg up when every little bit helps. We were there once as well and took comfort knowing that no matter our size, our business was important to Journyx."

The Journyx Solution

SemBioSys Genetics currently uses Timesheet to track all of its 75 employees' time, including regular, vacation, personal, etc. They also use the project feature to track several major projects being worked on in the company. Looking forward, they plan to implement the expense and mileage modules soon.

"Since we do contract project work for other laboratories, it's very useful that Timesheet allows us to ensure accurate billing for work performed no matter where we are," says Kuhn. "The greatest advantage we've had with Timesheet is to understand where our resources are spending their time."

About Journyx Timesheet

Journyx Timesheet is a timesheet and expense management solution that enables organizations to automate management of employee time and expenses for project control, customer invoicing, and payroll processing. Journyx offers patented technological solutions -- not just generic tools -- that are flexible, adaptable and free to try, in order to help companies identify profit opportunities along the per-person, per-project continuum.

About Journyx

As the creator of the Web-based time tracking industry, Journyx carves out its own path, while guiding customers to their goals and destinations. Journyx helps customers reach the highest levels of profitability by automating labor-intensive, paper-based processes with a superior, Web-based solution. Founded in 1996, Journyx is the *first and only* company to establish Per Person/Per Project Profitability (P5), a proprietary process that enables customers to gather and analyze information to discover profit opportunities. Journyx has thousands of customers worldwide, including American Airlines, Bayer, AC Nielsen, L'Oreal, The Discovery Channel, Schlumberger, Capstone Turbine and many others. Journyx solutions are available both as software-as-a-service (SaaS) and on a standard license basis. For more information, go to <http://pr.journyx.com> or contact Journyx at (512)834-8888 or info@journyx.com.
